DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-7 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Menton 3,396,807.

Menton discloses a rotational impact assembly for a drill bit including:

- a housing (38) adapted to be rotated by a rotary drive
- a bit (16) extending from the housing and being rotatably driven thereby
- a rotary drive (14 and 30) located in the housing for periodically and rotatably impacting the drill bit

In regards to claim 7, the housing further comprises a bit shaft (40) through which the drill bit is rotatably driven.

In regards to claim 10, the rotary drive is driven by a drill string.

Allowable Subject Matter

3. Claim 13-16 and 18-27 are allowed.

Art Unit: 3671

4. Claims 8-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments filed 3/31/03 have been fully considered but they are not persuasive.

6. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., that the bit must always be rotating at a speed at least equal to the rotational speed of the housing) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). Applicant's claim does not recite that the bit must always be rotating at a speed at least equal to the rotational speed of the housing as applicant seems to argue. Therefore, even if the bit in Menton slows, Menton still meets the claim limitations.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 3671

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
